Please record the code of the report for future measurements. Code: USIL007004

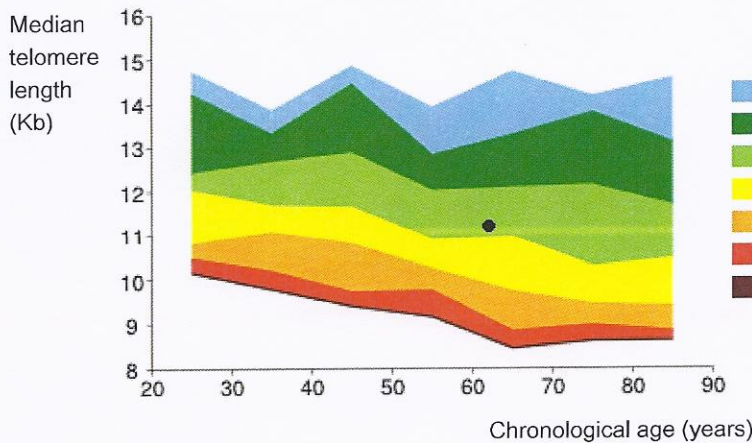

# 1. Your telomere length

Median Telomere Length: 11.2 Kb

Your median telomere length is estimated to be **normal** compared to Life Length's database population.

# 2. Median telomere length – Comparison by age band and percentiles

The adjacent graph shows a comparative analysis of the median telomere length in your sample compared with the control database.

Each line represents a specific percentile of our database.

For example, falling in the 75<sup>th</sup> percentile means that 25% of people of your age have a longer median telomere length than you.

It is therefore best if your results falls into one of the higher bands.

# 3. Your estimated biological age

Estimated Biological Age: 61.9 years old

Chronological Age: 62.2 years old
